

Blood extension activity sheet

Matching blood donors and patients

1 Draw lines to connect donors to patients.

There are several ways to do it. But you must find a way that every patient gets the blood transfusion they need, otherwise they will die.

And remember! A patient must be given blood from a donor with the right blood group.

The five donors:

The five patients in need of a blood transfusion:

Janice has sickle cell anaemia.
Which part of the blood do you think she needs?

He has haemophilia. This disease that affects his blood's ability to clot.
Which part of the blood do you think he needs?
